INFRARED GROUND THAWING HEATERS

Heating Solutions for Cold Weather Excavations

THE TOASTER INFRARED HEATER READY TO TARGET FROZEN GROUND

Engineered to defrost frozen ground, the Toaster enables precise, targeted thawing. By directing heat to the surface below—even in extreme cold—the Toaster efficiently prepares specific work areas for excavation or trenching.

Ideal for **integrity digs**, **trenching utilities**, **thawing frozen water or sewer lines** and other applications.

Operates with **minimal power requirements** and **low fuel usage** for maximum efficiency.

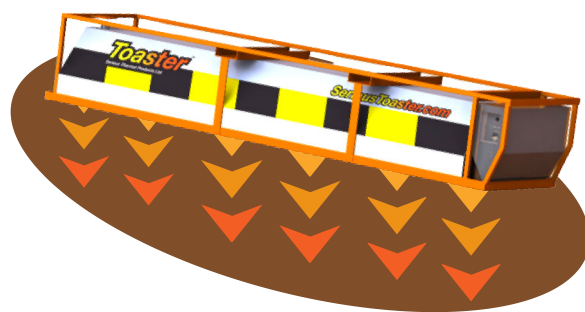

Stackable design and **self-contained mobile trailer** allow for easy handling and quick set up.

Saves you time and money on winter projects.

Dimensions: 10' x 2' x 2'
Weight: 345lbs

Output: BTU 88,000
Power: 110V @0.8 Amps
Fuel: Propane
Consumption: Average 4 Pounds/Hour

Stainless Steel Reflector
Solid State Electronics
Patented Technology

Top 10 Reasons to Rent Toaster Infrared Heaters

- 1) **FAST:** Thaws up to 1.6 inches per hour
- 2) **SIMPLE:** Easy to set up and operate
- 3) **SAFE:** No open flames or exposed elements
- 4) **CLEAN:** Runs on propane and electric power
- 5) **SCALABLE:** Nose-to-tail or side-by-side configurations for connecting multiple units
- 6) **RELIABLE:** Rated for work in -40°C weather
- 7) **FOCUSED:** Thaws a 2' x 10' work area
- 8) **CSA APPROVED:** Meets high safety standards
- 9) **RUGGED:** Steel/stainless steel construction
- 10) **SERVICE:** Quick to troubleshoot and repair

Proudly **designed and manufactured in Alberta** by Serious Thermal Products Ltd.
