

Airplaco HG-9

Model: **HG-9**

Airplaco HG-9 Hand Grout Pump

Door / Window Frames

Void Filling

Piling Encasements

The Handy Grout HG-9 grout pump includes a cast assembly and polyurethane hopper. This grout pump design maximizes two important features, durability and weight. The HG-9 grout pump's cast assembly ensures a durable design free from excessive welding and its polyurethane hopper ensures lightweight and easy cleaning. The HG-9 grout pump's horizontal piston ensures a self priming pumps through its heavy-duty ball check manifold system An in-line pressure gauge allows the operator to monitor the efficiency in relation to the thickness of the slurry used for the application.

- Door Frames / Window Frames
- Waterproofing
- Rock Bolting / Soil Anchors
- Machine Base Grouting
