

## Mark II TrimMaster<sup>®</sup>

VMTM10

The Mark II TrimMaster<sup>®</sup> features leading technologies such as the POWERslot™ for easier bending, making smaller “J” channels and hollow core hinge extrusions for added strength. You have the ability to make fine-tune adjustments to this brake, though you may never have to. Ultra High Molecular Weight (UHMV) wedges are independently adjustable and replaceable should the occasion ever arise.

**Length: 10'6"**  
**Weight: 114 lbs**

- POWERslot™ - technologies adds more bending power without sacrificing capacities
- Quick Hemming - easily makes 180° over bends
- Built-in Tape Rule - Standard / Metric scale
- Large Working Pocket - for complex custom bends without brake interference
- Vinyl Strip - does not mar metal finishes while providing cushioned contact during bends
- Adjustable - you may never have to adjust your brake, but if you want to that option is available
- Full Look Handle - ergonomic and easy to grab, ensures even bending. Detaches quickly for transport

## Optional Accessories

### TrimCutter™

VM3017

- Knives made from 100% hardened tool steel
- Tool uses 4-point roll bearing track system

### Stand

VMUSA1

- Durable steel construction
- Rugged composite wheels
- Adjustable mounting hardware
