

G25 - G570 | Mobile Generators

Portable Power

It's all about Uptime

Doosan Portable Power understands reliability. We engineer it into every generator we build. Enclosures are built from heavy-duty components. Engines and alternators are selected to provide fuel-efficient operation and superior output. Controls are simple to operate and easy to monitor. All of this is backed by simply the industry's best technical, application and service support. Whatever your application, whatever your performance measurement, our generators exceed all expectations.

Doosan Portable Power engineers solutions to meet the challenges of the toughest rental and construction projects around the world. Uniquely designed air-intakes ensures dirt and debris do not enter the generators in extreme environments and their sound suppressing design makes Doosan Portable Power generators perfect for special events and other applications where low noise levels are required.

Long runtime and environmental protection

Units feature 24-hour onboard fuel capacity, plus an environmental containment system that can contain and prevent spillage of 110% of all fuel, oil and coolant volume.

Rugged and reliable for years of power and performance

Units are built on heavy-duty skidbases and feature the toughest running gear components for safe and trouble-free towing, on- or off-road. The enclosure is built from heavy-gauge steel and finished with a 13-stage powder coat process to provide the ultimate in corrosion protection for long life and exceptional resale values.

Features you can count on — from the experts in mobile power generation

High performance with low sound levels

Our generators are perfect for special events and other applications where low noise levels are required. Thanks to

an innovative enclosure design, which optimizes airflow through the package, these units provide the performance required in extreme ambient conditions while still providing class-leading sound levels.

Hassle-free voltage configuration

Three position voltage selector switch is standard on all models up to the G185 and equipped with the industry's only protection scheme that prevents operators from

accidentally switching voltage during operation.

*G25-G185 only

Best-in-class motor starting

All models feature AREP excitation to provide voltage stability and give unmatched performance in powering pumps, compressors and other applications with high startup demands.

Simple connections, controls and monitoring

All units are equipped with operator-preferred analog control panels that are common across the product range. Remote auto start/stop is a standard feature, and critical system faults are indicated on the diagnostic LED panel. Output connections can be made quickly and safely, thanks to the spacious access designed into the hardwire panel. Plus, all models feature a convenience panel including an array of GFCI outlets and twist-lock receptacles.

600 Volt

Our generators are available with a 600 Volt configuration specific to the Canadian market.

Transport Canada

TDG-certified fuel tanks available for over 450L which are required as per TDG Act.

* Dedicated 600V alternator available for G240-G570 models

** Transport Canada TDG certified fuel tanks available

Doosan Portable Power's generators will meet the most demanding applications in extreme freezing conditions.

The new **Tundra Package™** assembles the necessary components to keep your Doosan Portable Power generator prepared to start on command and run perfectly in the coldest environments down to -40°F/°C.

We know it is imperative that your generator provides the power you need whenever and wherever you need it. That's why our engineers created the new Tundra Package. The Tundra Package ensures your generator's ready to perform at its best no matter the weather.

Contact your Doosan Portable Power dealer to order the Tundra Package today!

Experience Doosan Portable Power and our industry-leading support and service. Whatever the job, we have the solution. From our comprehensive range of air compressors, lighting systems and generators to our rugged and reliable light compaction equipment, we have a solution to fit your needs. Running a successful business takes more than powerful equipment. That's why Doosan Portable Power partners with an experienced global dealer network to stand beside you every step of the way. Doosan Portable Power — more than 100 years of providing excellence.
