

PICKUP BROOM

The Blue Diamond pickup broom is designed for heavy commercial use. Years of market research lead to this premium broom that will stand up to the rigors of the roadwork industry as well as hold up in rental applications. This simple, clean design gives added structure to typical wear areas and damage prone components such as a built in water kit, and heavy reinforcement on the front of the broom shroud. The low profile water tank allows the operator better visibility of the work area thereby reducing accidents. The 26" diameter poly or poly/steel broom is available in 60", 72", 84" and a 96" width. A bolt on 3/4" double bevel edge protects the 3/4" weld in edge from wear and adds strength the leading edge of the bucket. Wear bars welded to the bottom of the bucket provide strength and protect the bucket from premature wear.

Features include:

- Predrilled for optional pressurize water system
- Mounts for gutter brush included
- Bolt-on-rubber skirting to contain debris
- Motor and shaft guards
- 1 1/2" x 7" Zinc height adjustment pins with 4 positions
- Heavy duty dump stops
- Grease fittings on all pivot points and bearings
- Steps mounted on back of bucket for entering and exiting the host machine

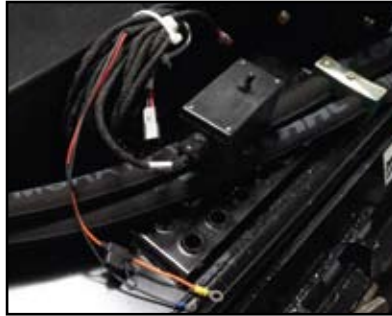

QUALITY | DEPENDABILITY | INTEGRITY
